Press Release

AIO Systems Announces Strategic Partnership with Jabil to Resell AIO's IoT SaaS Solutions

The companies will combine strengths to provide innovative, IoT site management solutions

Johannesburg, South Africa, October 19, 2017 - AIO Systems Ltd. and Jabil Energy, a division of Jabil Inc., today announced a strategic partnership to provide a cloud-based, total remote site monitoring and control solution, based on AIO's IoT SaaS technology. Jabil Energy has chosen AIO's solution as their preferred IoT solution for new customers in Africa and APAC.

The strategic partnership will capitalize on the strong reputation AIO Systems has developed as a market leading provider of IoT SaaS based total remote site management solutions utilizing EyeSite technology and on Jabil Energy's resources and expertise in providing turnkey distributed energy solutions across the African market.

"This partnership reinforces each organization's strong commitment to provide customers with a single source for the best in class IoT total site management solution, encompassing both equipment and service," stated Asher Avissar, CEO of AIO systems. "The agreement expands AIO's IoT solution's reach opening infinite business prospects for Jabil's existing and potential customers. When our advanced IoT solution is combined with Jabil's reputation for excellence in product support, a new driving force is formed. One that can't be matched in the telecom tower industry. Its unparalleled results will be revealed in 2018."

"This relationship combines the strength of Jabil Energy and our experience of deploying RMS in Africa and other territories with the excellent solutions suite of AIO to drive the next generation of IoT based infrastructure management and energy solutions into the future," says Etienne Gerber, business unit director at Jabil Energy. "The prospect of a smart energy solution managed by next generation IoT, which could be applied to any industry, is extremely appealing to us. The AIO suite will thus expand our offering and allow us to address these new markets."

Under the agreement, AIO will build an IoT SaaS cloud to support Jabil Energy's existing installed base of thousands of sites, belonging to one of their strategic tower customers. Jabil will resell AIO's cloud-based total remote site management solution exclusively through their distribution network in Africa, with plans to expand to APAC in the near future.

About Jabil

Jabil (NYSE: JBL) is a product solutions company providing comprehensive electronics design, production and product management services.
