IOT by AIO

CLOUD-BASED TOTAL
SITE MANAGEMENT

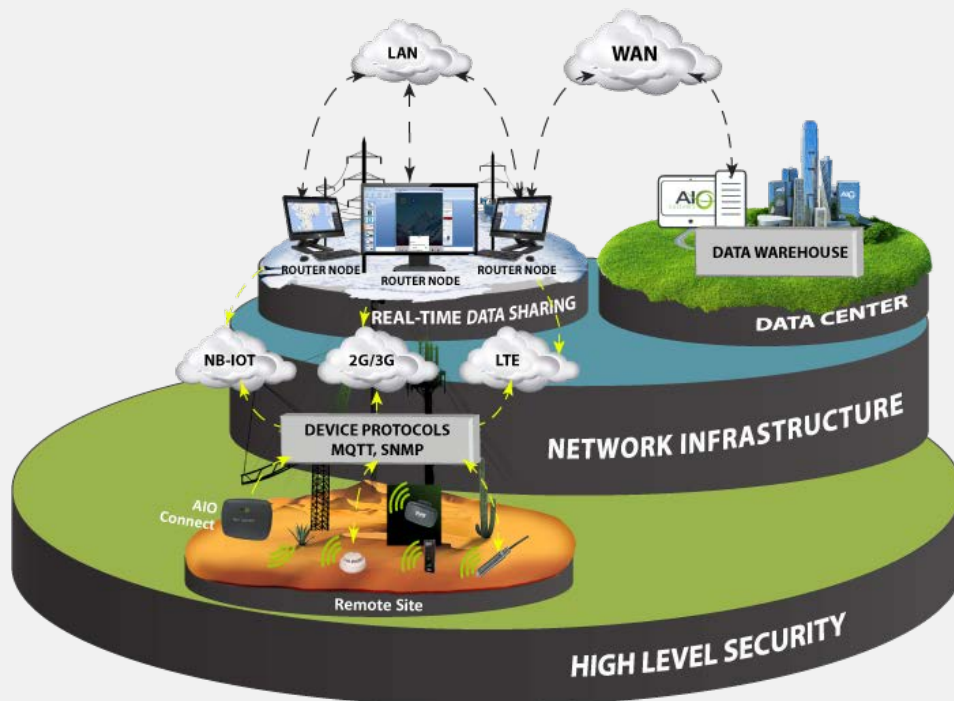

We took our expert RMS know-how and extensive hands-on experience gathered in the field and applied it to the IoT world bringing you a best-in-class IoT solution - AIoT

Small. Wireless. Cloud-Based.

Superb quality at a fraction of the price.

Our topology is holistic, based on AIO's own components for all IoT realms: Core, Edge and Cloud.

At the core, sits the Linux-based, IOT Connect gateway which gathers all the edge data through AIO peripherals, or via AIO, small size, wireless IoT mediators, the Sensor Connects. This data is then uploaded to the cloud-based CMS for comprehensive expert analytics.
